

## Alma Hill

Client: Private Owner • System: Wall System 2 • Material: Silicone Render, GEPS  
Sector: Refurbishment, Low Rise, Residential

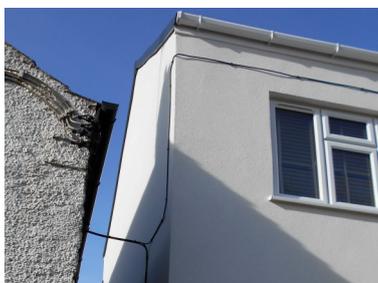

### The Project

Completed in October 2015, this solid brick refurbishment on Alma Hill which received GDHIF funding, successfully delivered a .30 u-value calculation, down from 1.9 using the SPSenvirowall grey EPS board and a colour through render finish which was installed by Westville Group who also carried out roofline and window works to the property.

### The Challenges

Westville faced working with a previously poor render and window bays, requiring the placement of new structural steel lintels and the renewal of all rainwater goods.

The addition of a new porch had to ensure no cold bridging occurred, this was achieved using an internal board to overlap.

To the delight of the customers, their house was transformed from being unpleasant and uninviting into an attractive and warm home.

Mr Fundrey of 40 Alma Hill says:

“In 2015 I had Westville carry out my external wall insulation, from starting the work, progression and finalizing the last details of the work carried out by the Westville team were extremely professional, courteous and always polite. Now when I look at my property, it is fair to say Westville exceeded my expectations on the end result, my house looks amazing and I’m much warmer as the heat is more consistent. I would highly recommended Westville. Thank you”

### CPD events available

For those interested in finding out more, we provide informative RIBA accredited CPD sessions.

To book a CPD sessions, please call: 01782 367600
