

## DAFA Facade Kit™ DAFA Sealing Tape

### Description

DAFAs sealing tapes is weather-proof and permeable sealing tape that prevents the formation of dry rot and mould in the structure.

### Application

DAFAs sealing tape is used for the external sealing of windows and doors and for various industrial sealing applications. The sealing tape slowly expands until it completely fills the joint – even into the smallest irregularities.

### Benefits

- BG1 approved in accordance with DIN 18542
- Subject to ongoing unannounced external quality checks with regard to water-proofing
- Up to 15-year product and function guarantee
- Weatherproof
- Controlled expansion
- Prevents the formation of heat/cold bridge
- Sound absorbent: 58 dB in a 1-stage joint
- Securely smoothes out even the smallest irregularities
- Highly resistant to mould and microorganisms
- Self-adhesive on one side
- Can be installed at any time of the year
- No joint slip
- Water resistant (tested up to 1,359 Pa)
- Covers seal widths of 2 – 40 mm
