

## St Mary's Island

Client: Countryside • System: TS Rail • Material: EPS, SpeedySlip Brick Slips, Silicone Render  
Sector: Residential, High Rise • Build Type: New Build

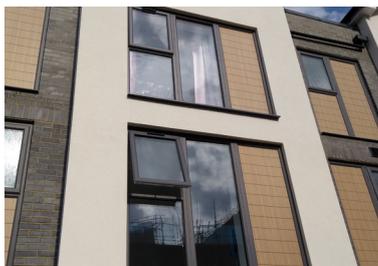

St Mary's Island is an attractive new build residential development in Chatham, Kent.

EWI installers, Stanmore carried out the installation of SPSEnviowall's TS rail system with EPS, using silicone render and flexible slip finishes for the external facade which complements the aesthetics of the local environment.

### Benefits of SPSEnviowall's TS Rail System

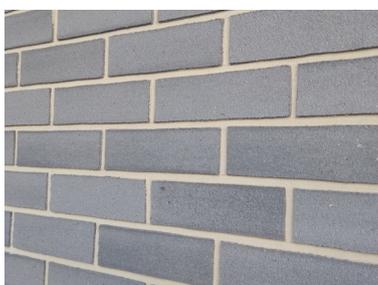

- BBA Certified Full scale fire tested.
- Compliant BS8414 Part II
- EPS system compliant over 18 metres
- RwdB 45db-55db sound reduction

Main contractor, Countryside were able to benefit from a huge cost saving by choosing SPSEnviowall's system and facades over facing bricks. There was a reduction in detailing costs due to the two different finishes being used on the same backing system.

### Benefits of SPSEnviowall's SpeedySlip Brick Finish

- A2 rating or better on all key system components available
- Lightweight system
- Cost effective compared to traditional brick slips
- Ideally suited for both low and high rise applications
- Long life span and no maintenance costs

With the reduced weight of the TS rail system compared to traditional brick work, no additional structural reinforcement was required, further reducing the cost to the client.
