CHALLENGES

Access was one of the biggest obstacles. Everything – boards, fixings, materials had to be carried by hand up scaffold haki staircases. No hoists, no shortcuts. Our in-house loading crew hit their limit within days, and that's where Star Loaders stepped in. They handled the logistics with precision and kept the install moving at a time when we were close to coming to a standstill.

SOLUTIONS

Once the new spec was approved, we restructured quickly. We brought in GW Construction Ltd, led by Tony, with up to ten experienced boarders. Straight away, progress picked up and elevations started flying up.

BENEFITS

High-Performance System

1

The Envirowall render system delivered strong, consistent results from basecoat to topcoat, with a sharp visual finish that enhanced the building's appearance.

Reliable Technical Support

2

SPSEnvirowall's expert advice, quick responses to redesigns, and steady supply chain ensured the project stayed on track, essential for a time-sensitive job.

Excellent Collaboration

3

The Miller Knight team provided outstanding support from the beginning, contributing to smooth project delivery and overall success.
